Quick Start Guide

1. Download Verifit 2.0 app:

The smart band needs to pair with the smart phone through the app.

Download option 1:

Searching the QR code: Scan and download app.

Please use the QR code Scan tool to scan the below QR code, open the link and download app. In case there is any problem with opening the link, please try to copy the link and open it by browser.

Download option 2:

Search in the phone market and download.

Please search and download "Verifit 2.0" from App Store or Google play store.

2. Device Activate & Charge:

Make sure power is working normally before initial use. In case the device is on a low battery, connect the device to the charger. Device will automatically boot up. (Please clamp the charging clip to the back 3 point position of bracelet as below)

3. Pair the device:

Please make sure the Bluetooth is ON and then open app "Verifit 2.0" and go to bind. When searching and pairing the device, please select your device and activate it on the screen. App will search the device automatically, choose the device name and connect the device to the app.

Select the device in the smart phone searching list

How to Use

Once the device is connected to the app successfully, it will record and analyze your activities and sleep status automatically, please press the button on the device to switch into different display modes as follows:
